

PREVENTS SNOW AND ICE BUILD-UP IN GUTTERS AND DOWNSPOUTS

Snow and ice prevention systems are essential for making gutters and downspouts clear of snow and icicles safer to reduce liability. Due to Calorique amorphous metal heating technology, installing and operating gutter and downspout ice/snow melting heating systems is practical and affordable. Easy to install, our robust heating system is designed for outdoor exposed environment applications for gutters and downspouts and to be used in conjunction with our *Perfectly Clear Roof De-Icing System*. This product is manufactured with UV and FR additives to withstand sunlight exposure and resistance to fire. No need for multiple runs in 4" - 6" Gutter.

Perfectly Clear Gutter and Downspout product kit consists of the basic heating element customized and ready for installation. The mounting hardware contained in the kits is made of corrosion free metallic clips for anchoring the cable every 6 feet.

**Perfectly Clear Gutter and Downspout Heat is easy to install !
Installation instructions and warranty registration are included in each kit.**

Easy Installation Steps

1. Perfectly Clear Gutter and Downspout Heat is designed to be hard wired
2. Determine the length of the area to be heated and sketch your layout. Include the location of the power source in your diagram.
3. Power connections should be installed in a protected area
4. Clean the gutter and downspout from any debris before installing your Perfectly Clear Gutter and Downspout Heat
5. Begin the installation at the power connection, and unroll the product
6. Anchor gutter cable every 6 feet or as necessary (clips included)

Flexible – Bends easily

Clips in place

Contours

90° angle turns
